Add ons for Content Publisher

HTTP Adapter

- ✓ Alternative to connection via HTTP
- ✓ TTP-based adapter set for RCE and TATAPI in SSH-less environments

1.980,- €
Net plus statutory VAT.

Local Adapter

- ✓ This extension mounts a local file store in another local (live) file store.
- ✓ Improved performance
- ✓ Prerequisite: Filemounts of Stage and Live are on the same server

990,- €
Net plus statutory VAT.

Alternative SSH Adapter

- ✓ **in2publish phpseclib SSH2 adapter:** This extension provides an SSH2 adapter based on phpseclib and not on the php extension ssh2 as required by in2publish_core
- ✓ **in2publish Native SSH2 adapter:** This adapter uses the operating system's ssh and scp binaries to connect and transfer files to the foreign system.

1.980,- €
Net plus statutory VAT.

Add ons for the Content Publisher are available for purchase individually (valid for one major version). Updates for new major versions cost 50% of the current price list. Updates for all adapters are included in a maintenance agreement.
