TYPO3 Marketing Automation

Marketing automation is **intelligent** analytics software for identifying website visitors, **lead generation** and **lead development** (nurturing). For your company, the use of such a tool means support for marketing and sales through automation and lead generation.

Do you already use TYPO3? **lux - the marketing automation tool for TYPO3** helps you and your marketing to analyse and identify visitors and develop leads with just a few clicks in the TYPO3 backend. Finally use TYPO3 as the most important source for your leads and get a **return on investment**.

Test free of charge for 30 days!

Best practice for lead generation

- ✓ **Offer added value**
Provide your visitors with whitepapers or flyers in exchange for contact information.
- ✓ **Call-To-Actions**
Create many and direct channels of contact. This way you identify leads even if they decide not to send.
- ✓ **Context-dependent content**
Think about providing different content for different audiences.
- ✓ **Category-Scoring**
Offer more accurate information to evolved leads to drive the buying decision.
- ✓ **Develop yourself**
Learn from workflows that have been carried out and find the right approach for your target group.
